DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blinn (5,897,622) in view of Official Notice.

Blinn discloses all the all the features of the instant claims except as follows:

Blinn teaches a common interface that allows multiple merchants to customize their web presents yet offers common modules for accomplishing a web presents (see abstract FIG 2 and summary). Blinn however does not teach the use of XML as a communications protocol. It was old and well known at the time of the instant invention to use XML as a web protocol, it would have been obvious to a person of ordinary skill in the art to include in Blinn the use of XML, because the use of XML improves the functionality of the web and would provide greater flexibility in organizing and presenting information than is possible with the older HTML document coding method.
